brian phillips

# Statement about the project

The work focuses heavily on automation. I'm interested in building systems that can self-manage, produce and archive work on their own. To accomplish this requires a shift away from a traditional studio practice to one that is mostly digital. My process involves writing custom computer software that either: generates work, or automates a workflow.

I am currently working with the automated bots that were caught probing (attacking) my server. The shape, color, and position of each piece is determined by the [IP address](#) (a unique identifier given to every computer when accessing the internet) of the attacking bot.

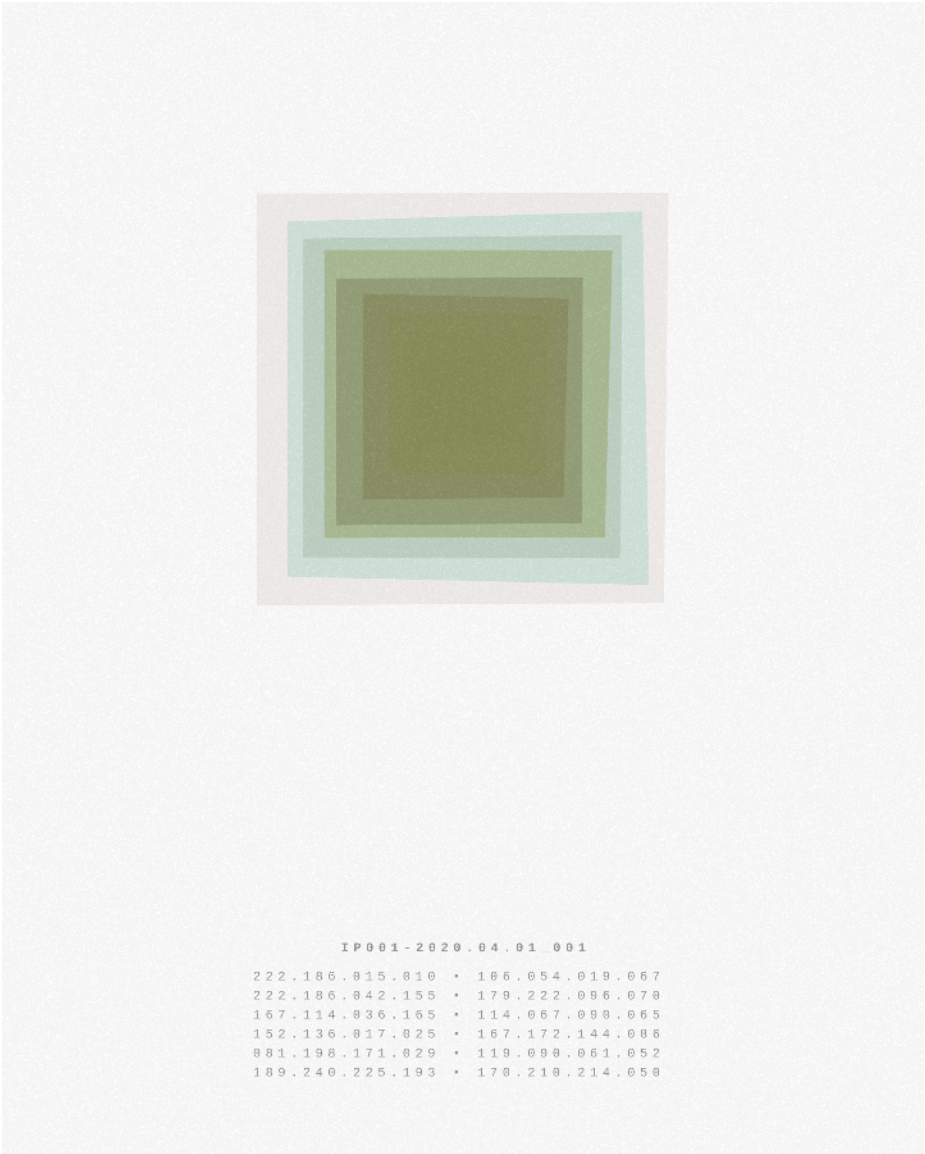

Ultimately these bots would love to go about their business unnoticed. There is something beautiful and maybe a little ironic in finding them and using their own identifying characteristics to generate a piece of art.
